Computer Skills

Languages: Javascript/Node, HTML, CSS, Shell Scripting,
PHP (novice), Rust (beginner), C++ (beginner)
Software: Git, Sublime Text, Vim, Photoshop, Ableton
Databases: Postgres, MySQL, CouchDB, Mongo
Infrastructure: Amazon Web Services, Docker, Unix/Linux

Interests

I'm extremely interested in music and digital signal processing, as well as space and the cosmos. An ideal job for me would be using technology to develop new ways to analyze signal inputs and find useful signal within the noise. I also love to tinker and build things - taking apart and putting things back together is my favourite way to learn.
